SUMMARY

Telecommunication Engineering undergraduate with experience in network engineering, Linux server administration, and infrastructure monitoring. Research intern at PT Telkom Indonesia, Telkom Test House, covering server fault diagnosis, TR-369/USP implementation on GPON access devices, and telemetry monitoring. Head of the Infrastructure Sub-Division at the Adaptive Network Laboratory, overseeing its network, server, and hosting operations.

EDUCATION

Telkom University

Bandung, Indonesia

Bachelor of Telecommunication Engineering

Sep 2023 - Expected 2027

- GPA: 3.47/4.00, 122 credits completed.
- Relevant coursework: Computer Networking, Data Communication, Network Routing and Switching, Linux Systems, Network Security, Quality of Service, Cloud Computing.

PROFESSIONAL EXPERIENCE

PT Telkom Indonesia, Telkom Test House

Bandung, Indonesia

Research Intern, Broadband Access Network Division

Jun 2026 - Sep 2026

- Diagnosed and repaired a non-booting Dell PowerEdge R730 server, using iDRAC event logs to isolate the fault to the motherboard.
- Developed Sounding Bot, a WhatsApp automation that collects and tracks weekly reports from division members.
- Implemented the TR-369/USP device management protocol on a FiberHome GPON ONT using the OktopUSP controller over MQTT.
- Evaluated OpenUSP as an alternative controller and documented its limitations in an internal technical report.
- Sourced test devices through TP-Link technical support and its authorized distributor, adding a second vendor to the tests.
- Built real-time telemetry monitoring for network devices using Telegraf, InfluxDB, and Grafana.

Adaptive Network Laboratory

Bandung, Indonesia

Head of Infrastructure Sub-Division, General Affair Division

Jun 2026 - Present

- Lead the sub-division responsible for the laboratory network, servers, and hosting.
- Manage virtualization and monitoring services supporting laboratory research and teaching.
- Prepare standard operating procedures for device configuration, documentation, and handover.
- Handle infrastructure requests from other divisions and keep shared services available.
- Plan infrastructure upgrades and report system status and resource needs to management.

Practicum Assistant

Oct 2025 - Present

- Run laboratory sessions on data communication, transmission media, and networking fundamentals.
- Guide students through static and dynamic routing configuration.
- Teach Linux fundamentals and how to deploy network services.
- Assist students in designing, simulating, and analyzing Quality of Service in centralized networks.
- Provide technical guidance on troubleshooting network configuration issues.

Member, Infrastructure Sub-Division, General Affair Division

Oct 2025 - Jun 2026

- Maintained the laboratory network and servers, including health monitoring and routine maintenance.
- Administered web hosting and internal server services.
- Resolved connectivity and infrastructure issues reported by laboratory members.

Mentor, Adaptive Training**May 2026**

- Delivered public workshops on system monitoring and observability.
- Taught dashboard and alert configuration using Grafana and Prometheus.
- Introduced log management and visualization using the Elastic Stack.

Mentor, Netschool 2025**Oct 2025 - Dec 2025**

- Mentored students from different majors in a networking study group.
- Taught VLSM subnetting, switching, static and dynamic routing, VLAN, and Inter-VLAN routing.
- Guided participants through hands-on exercises and helped them debug configuration errors.

Participant, Netschool 2024**Oct 2024 - Dec 2024**

- Applied VLSM subnetting and configured switching, VLAN, and Inter-VLAN routing.
- Practiced Linux system administration through SSH access, service and process management, and Bash scripting.
- Configured a DNS server and HTTPS-enabled web servers on Apache2 and NGINX.
- Built Python programs applying functions and object-oriented programming.

Multimedia, Big Data, and Cyber Security Laboratory

Bandung, Indonesia

Participant, Digital Learning 2025**Apr 2025 - May 2025**

- Studied machine learning and data visualization for big data analysis.
- Completed cyber security exercises in ethical hacking and Capture the Flag challenges.
- Built a Unity-based augmented reality application for geographic information systems.
- Developed a game prototype.

ORGANIZATIONAL EXPERIENCE

Central Computer Improvement

Bandung, Indonesia

Member, Network Division**Dec 2023 - Dec 2024**

- Configured subnetting, routing, and switching for division network activities.
- Troubleshoot and maintained network configurations.
- Developed working knowledge of network design and infrastructure planning.

Dorm Team, Telkom University

Bandung, Indonesia

Member**Nov 2023 - Jun 2024**

- Coordinated dormitory events, administration, and student activities.
- Organized dormitory events and student activities for residents

CERTIFICATIONS

- Huawei Certified ICT Associate (HCIA): Datacom V1.0, Cloud Computing V5.5, Cloud Service V3.5.
- Cisco Networking Academy, CCNAv7: Introduction to Networks.

SKILLS

Networking: Computer networking, routing and switching, VLAN and Inter-VLAN, VLSM subnetting, Quality of Service, network design, Software Defined Networking (SDN), TR-369/USP, TR-069, MQTT, GPON and ONT provisioning

Systems: Linux system administration, server and service management, virtualization, Bash scripting, SSH, Apache2, NGINX, DNS, Docker, Proxmox, Dell iDRAC

Monitoring: Grafana, Prometheus, InfluxDB, Telegraf, Elastic Stack

Programming and Automation: Python, Node.js, n8n, REST API integration

Tools: Cisco Packet Tracer, Microsoft Office

Soft Skills: Problem solving, teamwork, time management, communication

Languages: Indonesian (native), English (intermediate)
